

# ShoGo Integration

## What is ShoGo?

ShoGo is a cloud-based service that seamlessly books your sales data directly from your store's POS system to QuickBooks automatically. In addition, ShoGo provides in-depth analysis of your store's data, including multi-store analysis. It supports both Quickbooks for Windows and Quickbooks online.

### Connect directly to your POS

ShoGo pulls sales data directly from your NCR Silver POS system and automatically posts the data to QuickBooks.

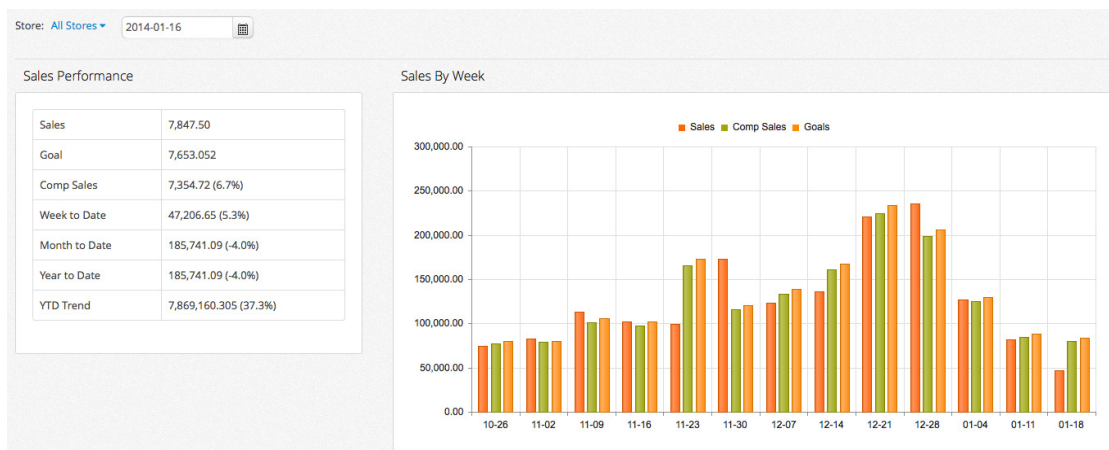

### Seamless Quickbook integration

ShoGo leverages Intuit's QuickBooks API platform to seamlessly post daily sales data to your QuickBooks companies.

- Automatically post department sales, tax, credit cards, discounts, gift cards, paid outs, and over/short.
- Optionally group deposits together (e.g. store and cart)
- Support for QuickBooks classes, multiple companies
- Modify accounts/line items yourself at any time
- Rock-solid security. ShoGo passed an intensive security audit by Intuit.

## Sales Dashboard

See key sales performance stats for all your stores at once:

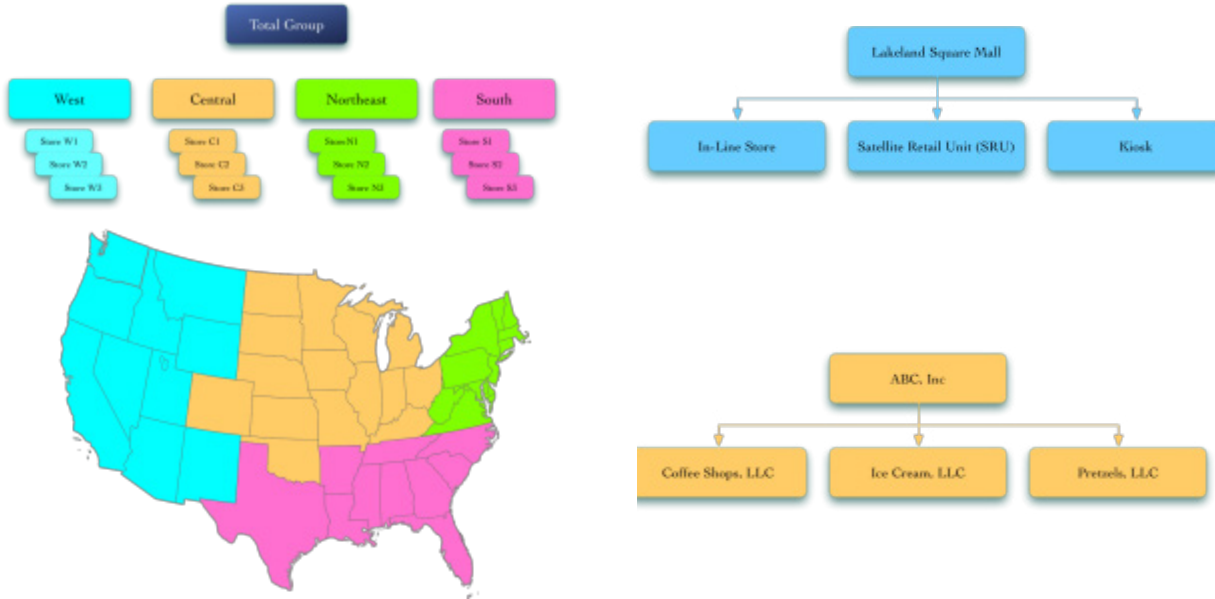

- Track actual sales against comps and sales goals.

- Rank your stores by sales comp %, Net Sale per Transaction (“NSPT”), customer counts, etc.
- View month-to-date, year-to-date comps for all your stores, a group of stores, or each store individually.

## Group Stores

Any way you want and as many groups as you need.

# NCR Silver and ShoGo Integration

## Connect directly to your POS

ShoGo is a 3rd party solution that merchants will subscribe to outside of NCR Silver. ShoGo will bill merchants directly for this service and provide customer support to merchants with any questions on the solution or the data being transferred. Merchants can find current pricing on the ShoGo website at [www.ShoGo.io](http://www.ShoGo.io) ShoGo provides a free 30 day trial with no long term contract.

## Getting Started

Merchants who want to turn this feature can get going in 3 easy steps:

1. Call NCR Silver customer care to enable the integration.  
Customer Care will:
  - a. Log into merchant account, go to Settings, select Admin .
  - b. Enable APIs for the store. If multi store, enable APIs for each store under the merchant.
  - c. Go to the My Account page and generate the client secret. If multi store this is done at the Company View level (one client secret for all stores).
  - d. Instruct the merchant that they may now log into their Silver Back Office and go to My Account. They will see their Client Secret.
2. Subscribe for ShoGo service directly with ShoGo by signing up on their website or calling them directly. Direct merchants to their website [www.ShoGo.io](http://www.ShoGo.io)

3. Connect NCR Silver to ShoGo
  - a. Merchants log into their ShoGo account and select NCR Silver as their POS.
  - b. Copy their client secret key from NCR Silver back office(under My Account) and paste into the key field in ShoGo.
  - c. Copy their NCR Silver account number and paste into the account field in ShoGo.

## FAQs

- **How often is data synched from NCR Silver into Quickbooks?**  
ShoGo will pull sales data from NCR Silver and post to the merchant's Quickbooks account nightly.
- **How much does ShoGo cost?**  
ShoGo provides a 30-day free trial with no long term contract. Their pricing varies based on the number of stores a merchant has. Current pricing can be found on their website.
- **What versions of Quickbooks are supported?**
