# You had me at **Aloha**

Run Your Restaurant with Aloha Cloud

You've curated a menu full of delicious food and drinks—but we know there's a lot more on your plate when it comes to running a successful restaurant. You need consistent, happy and reliable staff, you have to keep guests coming back, and on top of all of that, you must run a profitable business.

You need a partner and restaurant management platform that can help you **save time, worry less and sell more** so you can focus on your food not your tech.

## Aloha Cloud is a POS and restaurant management solution that helps you:

### Improve Efficiency

Aloha Cloud's point of sale is easy to use, which means training employees and serving guests is a breeze. Improve accuracy and service speed with handheld devices and a kitchen display system. And, you can expand beyond your 4 walls without adding to operational complexity with online ordering and delivery marketplace integration.

### Worry Less

We know your restaurant is always on your mind, but you can't be there all the time—especially if you have more than one location. With Aloha Cloud, you can access your cloud back office to view reports or make changes to one or more restaurants from anywhere: menu items, pricing, promotions, employee settings, and so much more.

### Keep guests coming back

How do you create a full experience that keeps your restaurant top of mind? Reward guests and encourage repeat visits with built-in loyalty and email marketing. You can also reach your customers at home by adding online ordering with images and branding to reinforce your brand. And, give them additional ordering options in-store with contactless dining.

# Aloha Cloud: easy to use, powerful enough to help you run your restaurant
