

Mobile reporting and alerts with **Pulse for Aloha Cloud**

Get actionable information delivered directly to your mobile device in real-time

Know exactly what is going on in your business, regardless of where you are. With up-to-date information collected automatically from your Aloha Cloud POS system, Pulse gives you the power to make insightful and immediate decisions that directly impact the bottom line.

Manage your business effectively anytime, anywhere

Reduce the amount of time you spend on administrative tasks and gain insight into your business whether you are traveling, at home or in your back office. Pulse Real-Time gives you access to metrics such as net sales by hour, day part, category and order mode; labor dollars and percentage by job code, comps and voids, employee performance and more.

Engage and connect with employees

Receive data regarding employee performance, labor dollars and percentage by job code so you can continuously improve your staff's performance resulting in higher customer satisfaction.

Improve the guest experience

Understand the current state of your restaurant by viewing tables, number of guests, total guest check details and amounts, and more. You can use this information in realtime to actively improve the guest experience by adjusting your staff and operations and have more detailed table visits with customers.

Respond to the entire business whether you're on or off property

Understand the current state of your restaurant by viewing tables, number of guests, total guest check details and amounts, and more. You can use this information in realtime to actively improve the guest experience by adjusting your staff and operations and have more detailed table visits with customers.

Contact us today:

Key features

Breakdown of net sales by hours, revenue center, ordermode, and more!

Identify items not being recorded with immediate check viewing
